

REMEDIAL SITE ASSESSMENT DECISION – EPA Region 04

Site Name: LAKE CONESTEE

Alias(es):

City: GREENVILLE

County or Parish: GREENVILLE

State: SC

Refer to Report Dated: 08/15/2019

EPA ID: SCN000407298

Report Developed By: START

State ID:

Report Type: Preliminary Assessment #001

Decision Date: 08/15/2019

- ☐ 1. Further Remedial Site Assessment Under CERCLA (Superfund) is not required because:

☒ 2. Further Assessment Needed Under CERCLA.
Higher priority for further assessment

☐ 3. Remedial study/cleanup needed.

Decision/Rationale:

The EPA was petitioned in April 2019 to conduct a Preliminary Assessment at Lake Conestee due to the potential presence of hazardous substances in the lake sediments and sediments in the Reedy River. Lake Conestee is formed by a dam on the Reedy River south of Greenville, SC. Based on a thorough review of available file material and updating existing target value information, further CERCLA investigation is recommended at the site to identify current contamination concentrations in the sediments in the Lake and downstream in the Reedy River. This should be done via a Site Inspection (SI). Additionally, further investigation into upstream sources, both current and historical, needs to be conducted. Potential contaminants of concern at the site are PAHs, metals and PCBs.
